

Insightful Solutions Drives Remarkable Results for Episciences, Inc.

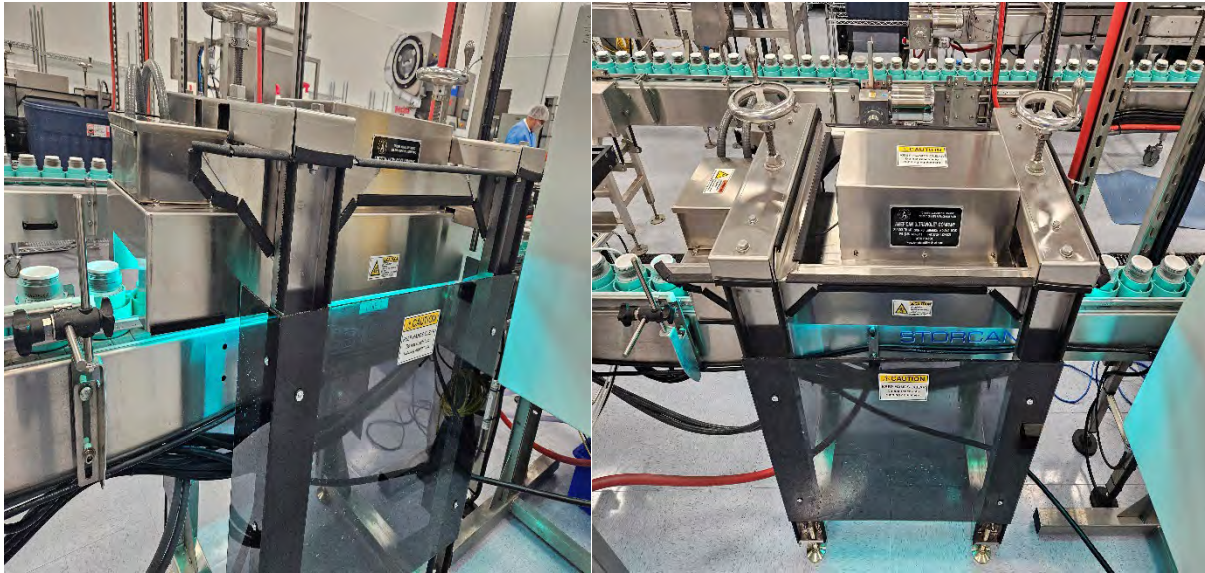

American Ultraviolet would like to share some exciting news about our latest innovation in container disinfection technology that has been transforming operations for companies like yours across the bottling industry - Beverage, Pharmaceutical, Cosmetic, etc.

Introducing our advanced Ultraviolet Disinfection Custom Design Units, specifically engineered to deliver unparalleled disinfection efficacy for containers of all sizes. Developed with cutting-edge UV-C technology, these units are designed to:

- Ensure optimum disinfection: Achieve disinfection of problematic pathogens such as bacteria, viruses, and mold within seconds.
- Enhance Operational Efficiency: Streamline your disinfection process with automated systems that integrate seamlessly into your existing workflow, minimizing downtime and labor costs.
- Guarantee Safety and Compliance: exceed customer expectations by implementing the highest standards of disinfection technology in container handling.

But don't just take our word for it. Companies like Episciences, Inc., based in Boise, Idaho, have already adopted our UV disinfection units and experienced remarkable results. Founded in 2002, Episciences, Inc. is the manufacturer and distributor of the Epionce medical grade skin care line and operates a Food and Drug Administration (FDA) inspected drug manufacturing facility in Boise. Epionce is a dermatologist developed skin care line that enhances the skin's natural youthful radiance.

Episciences, Inc. proactively retrofitted UVC to their existing bottling lines to ensure the packaging was properly disinfected to ensure the formulations maintain their proper specifications. See below for pictures of the Custom UVC units on their lines:

Episciences, Inc. has reported a significant reduction in microbial contamination incidents, resulting in increased customer satisfaction and operational efficiency. Episciences, Inc. has also seen a decrease in downtime related to cleaning cycles, translating directly into significant cost savings and improved asset utilization.

"We could not be more pleased with the results generated after adding these two American Ultraviolet custom UVC disinfection units to our container line."

~ Ron Hope, General Manager of Manufacturing and Distribution, Episciences Inc.

To further demonstrate the effectiveness of our solution for you and your containers, we would like to offer you a complimentary consultation and demonstration tailored to your specific needs. Discover how our UV technology can revolutionize your container disinfection process and elevate your operational standards.

Please do not hesitate to contact us at **(765) 483-9514** or **info@auvco.com** to schedule a convenient time for a demonstration. We are confident that once you see our units in action, you will understand why leading companies in the Beverage, Cosmetic and Pharmaceutical industries are choosing American Ultraviolet for their disinfection needs.

Thank you for considering this opportunity to enhance your operations with state-of-the-art UV disinfection technology. We look forward to the possibility of partnering with you to achieve new levels of safety, efficiency, and customer satisfaction.
